Website: Abdallahmassri.com | GitHub: github.com/AbdallahDevMassri | LinkedIn

Summary

Fullstack Developer experienced in building modern web apps using Java, Spring Boot, Node.js, React, Docker, and AWS. Skilled in designing scalable backends, responsive UIs, and managing full development lifecycles. Passionate about clean code and problem-solving.

Technical Skills

Frontend: React, JavaScript (ES6+), HTML5, CSS3, Responsive Design.

Backend: Java, Python, Spring Boot, Spring Security, REST APIs, JWT, Microservices, Node.js, Express.

Databases: MySQL, MongoDB, SQL, PostgreSQL.

DevOps & Tools: Docker, AWS (S3, EC2, Lambda), Jenkins, Git, CI/CD, Helm, Linux.

Other: OOP, Algorithms, Data Structures, JasperReports.

Projects

HR Pulse – HR Management System (Java, MySQL, JasperReports)

- Built desktop HR system with custom reports using SQL & JasperReports.
- Applied OOP principles and modular design.

eCommerce Site Fullstack Web App (React, Spring Boot)

- Secured REST APIs with JWT; responsive UI with React.
- Dockerized app and deployed on AWS Elastic Beanstalk.

Object Detect Bot (DevOps Project – AWS, Python, Telegram Bot)

- Telegram bot for object detection in images via S3 and Boto3.
- Used Jenkins, Helm, and Auto Scaling for CI/CD and deployment.

Education

- Practical Software Engineer Diploma, Ort-Kiryat Bialik | 2021–2023
- DevOps Engineering Course, Elevation Tel Aviv | 2024
- Java Spring Boot Mastery (Udemy) | 2025
